

Video Summarisation Tool

The complete design — a visual system plus the four screens that carry a long talk through the pipeline, from first upload to the finished cut. Open any screen below.

01**Design system**

Colour, type and components — the visual foundation.

**02****Upload**

Start a new summary — add the video, deck and summary document.

**03****Processing**

Pipeline status while the cut is generated — including the failure / retry state.

**04****Clip review & approval**

Review, reorder and approve the AI-proposed cut — the core screen.

**05****Output & download**

The finished 3–4 minute cut, ready to download and share.
